COMPANY PROFILE

Our job

For more than 25 years, a.b.e.® Industrial Products is the Mauritian representative of the South African brand a.b.e.® Construction Chemicals and position itself as one the local market leader in the building industry. Plant infrastructure investment, new technologies as well as technical customer support makes a.b.e.® a complete business solution in that market.

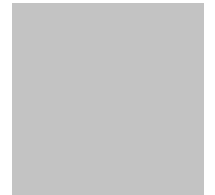

Our sales network

A.b.e. manufacturing plant is located in Black River District (La Joliette Lane, Petite Riviere) and service its customers by a network of merchant and hardware store businesses throughout the island.

Our fields of action

Over the years a.b.e. has acquired technology through its own product development and by being the official distributor of international manufacturer of specialised products. Today a.b.e.® is a leader in its field with many well-respected brands. Owing to these products to a.b.e.® have become a principal player in the following areas of expertise :

- Waterproofing
- Flooring
- Adhesives
- Sealants & Silicones
- Concrete Repair Products
- General Construction Products

WATERPROOFING

Waterproofing

Ready to use

Abe.® Membrane

HIGH STRENGTH POLYESTER
REINFORCED MEMBRANE

White

Suitable for use with a.b.e.® waterproofing and flashing systems.

Coverage :
As required

Roll
200 mm
x
10m

Roll
100 mm
x
10m

1 m²

*Bridges cracks and gaps
High strength
Reinforce waterproofing systems
Will not shrink or perish*

2 components
kit

Dura.® Flex

CEMENTITIOUS FLEXIBLE
WATERPROOFING SLURRY

Grey

Dura.® flex is used for :

- Waterproofing of showers, terraces, balconies, water reservoirs
- Protection and repair of balconies, terraces and hauching concrete of roads

Coverage :
6 m²/15kg kit
2 m²/5kg kit

Shelf Life :
12 months

5Kg
kit

15Kg
kit

*Approved for use in potable water systems
Excellent waterproof barrier
Effective on negative or positive side
High bond strength
Excellent resistance to chloride ion penetration
Brush or trowel application
Good abrasion resistance*

Stir well
before use

Clear

Dura.® Sil S
WATER-REPELLENT TREATMENT
FOR FACE BRICK

Durasil S is a clear-coating water repellent that also enhances self-cleaning properties to substrates such as:

- General exterior water repellent
- Protection of face brick structures
- Masonry finishes

It also minimises the unsightly forming of efflorescence on brickwork.

Coverage :

5 m²/L

Shelf Life :

12 months

1L

5L

*Easily applied by brush or spray
Preserves natural colour and texture of treated surfaces*

Excellent water repelling properties

Colourless

Excellent resistance to weathering

Water vapour permeable, breathable

Significantly reduces water absorption

No discolouring or staining

Reduces efflorescence

Stir well
before use

Grey
White

Super Laycryl
PROFESSIONAL LIQUID
WATERPROOFING COMPOUND

Super Laycryl is recommended for :

- All types of flashings
- Parapet walls
- Re-waterproofing over existing waterproofing systems
- Sealing of joints, laps and roofing screws on corrugated roofs
- The system is for non-trafficable roofs

Coverage :

2,1 L/m² for total system

Shelf Life :

12 months

1L

5L

20L

Super laycryl is an all-in-one system.

There is no need for separate primers (apart from metal surfaces) or top coats.

It has excellent weathering properties, adhesion and is tough, flexible and non-toxic.

Waterproofing

Stir well
before use

White

Super Laycryl fibrated PROFESSIONAL FIBRE REINFORCED LIQUID WATERPROOFING COMPOUND

Super Laycryl fibrated is recommended for :

- Waterproofing all types of stable flashings
- Waterproofing parapet walls
- Flat roof waterproofing
- Re-waterproofing over existing waterproofing systems
- Sealing of joints, laps and roofing screws on corrugated roofs

Coverage :

1 L/m² (minimum 2 coats)

Shelf Life :

12 months

1L

5L

20L

Fibrated super laycryl is an all-in-one system. There is no need for separate primers (apart from metal surfaces) or top coats. It has excellent weathering properties, adhesion and is tough, flexible and non-toxic.

Stir well
before use

Black

Super Laykold RUBBERISED BITUMEN WATERPROOFING EMULSION

Super Laykold is recommended in various areas :

- Flashings
- Parapet walls
- Sealing joints, laps and roofing screws on corrugated roofs
- May be used in areas of total water immersion

Coverage :

2,1 L/m² full system

Shelf Life :

12 months

5L

20L

Super laykold is an all-in-one system. There is no need for separate primers (apart from metal surfaces). It has excellent adhesion and is tough, flexible and non-toxic. Ideal for use in koi ponds.

**ADHESIVES - GENERAL
CONSTRUCTION - SILICONES
& SEALANTS**

Adhesives

2 base to 1
activator by
volume

Epidermix 372

EPOXY ADHESIVE, FILLER AND
GROUT

Base : White
Activ. : Amber
Mixed :
creamy-yellow

Epidermix 372 is used for :

- As a general purpose adhesive for most materials, excluding certain plastics and stainless steel.
- As a filler where it may be bodied with fine materials such as wood flour, silica sand and talc, to match the material being filled.
- As a grouting medium for fixing dowels and bolts, horizontally into concrete and rock.

Coverage :

1 L/m² for 1mm thickness in
general

Shelf Life :

24 months

500mL
kit

1L
kit

5L
kit

*Solvent-free.
Non-slump.
Easy to mix.
Bonds most materials.
Can be filled for use as a grout.
Economical.*

2 base to 1
activator by
volume

Epidermix 344

STRUCTURAL WET-TO-DRY
CONCRETE ADHESIVE

Base : Black
Activ. : Off white
Mixed : blue grey

Epidermix 344 is used for :

- Bonding fresh (plastic) concrete to existing concrete, plaster to brickwork.
- Providing a damp-proof barrier within the concrete matrix.

If applied onto reinforcing steel **epidermix 344** will cause no loss of concrete/steel bond strength.

Coverage :

1,7 - 2 m²/L for 0.5mm
thickness

Shelf Life :

24 months

500mL
kit

1L
kit

5L
kit

*May be used in structural situations.
Excellent bond to damp or dry surfaces.
High ultimate tensile strengths.
High ultimate lap shear strengths.
Bonds to rock.*

Stir well before use

Dura.® Cure WBW
Water-based wax emulsion
concrete-curing compound

Wet : White
Dry : Translucent

- Used for efficient curing of concrete in one easy spray application.
- Used for curing of large concrete surface areas.

Coverage :
approximately **6 m²/L**

Shelf Life :
12 months

*Retains moisture and facilitates hydration of cement.
Provides increased wear - dusting and cracking.
Water based product provides easier cleaning.
Easy and quick spray, brush or roller application*

Stir well before use

Dura.® Latex
MORTAR AND SCREED
IMPROVER AND ADHESIVE

Wet : Milky
Dry : Translucent

- Improves adhesion of thin section cement patches, mortars and screeds to their substrates.
- Improves tensile and flexural strengths properties allowing thin applications.

Coverage :
Dependant on application
and thickness of application

Shelf Life :
12 months

*Contains no chlorides.
Can be applied to damp substrates.
Improves mortars to provide waterproof repairs
Excellent bond to concrete, masonry, stonework,
plaster and blockboard.*
